## 33. Цепи с взаимной индуктивностью.

Коэффициент связи  $k = \frac{M}{\sqrt{L_1 L_2}}$ 

 $i=I_m sin at$ 

$$e_1 = -L_1 \frac{di}{dt} - M \frac{di}{dt} = -(\omega L_1 + \omega M) I_m \cos \omega t$$

$$e_2 = -L_2 \frac{di}{dt} - M \frac{di}{dt} = -(\omega L_2 + \omega M) I_m \cos \omega t$$

## Воздушный трансформатор

$$U_{I}=R_{I}I_{I}-E_{I}=R_{I}I_{I}-(-jX_{LI}I_{I}-jX_{M}I_{2})=(R_{I}+jX_{LI})I_{I}+jX_{M}I_{2})$$

$$E_{2}=-jX_{L2}I_{2}-jX_{M}I_{I}=I_{2}R_{2}+I_{2}Z_{H}$$
